For immediate release

Laval and Saint-Laurent, May 26th 2011

Uniquip Canada Inc. and Asept-Air Inc. are proud to announce a new and exclusive partnership for the Canadian Distribution of Asept-Air's patented RamJet™ Boss Radial Air Scrubber and Source Capture Machine.

“This unique product answers to growing demand in markets such as the rental industry, the construction industry or the remediation one. Many products were offered to these clientele but none offered a solution as efficient and as complete as the RamJet™ Boss.” says Yves Pronovost, General Manager of Uniquip Canada Inc. He adds “We are also proud to offer a quality product manufactured in Canada by a company with an extensive expertise in air purification. This partnership was an obvious one since Asept-Air and Uniquip share common values such as customer care and offering a quality product.”

“We are extremely excited about this new partnership with Uniquip Canada as it will not only enable us to bring our RamJet Boss into new markets and geographic regions across Canada but with Uniquip as our partner we will be able to provide an exemplary level of service and support” said Quinn Rico, President of Asept-Air. Adding, “The RamJet Boss was developed through our working with construction and remediation contractors as well as workplace health and safety organizations with the feedback being extremely positive and the results outstanding”

About Uniquip Canada Inc.
